

SUMMARY:

Aspiring Data Analyst with a strong foundation in Python, SQL, MS Excel, and Power BI, passionate about transforming raw data into meaningful insights that support data-driven decision-making. Skilled in data analysis, visualization, and reporting, with basic knowledge of C, Java, HTML, and CSS. Eager to apply analytical thinking and problem-solving skills to deliver valuable business insights.

TECHNICAL SKILLS:-

- **Programming Languages:** C, Python, Java
- **Web Technologies:** HTML, CSS, PHP
- **Python Packages:** NumPy, Pandas, Matplotlib
- **Databases:** SQL, MySQL
- **Data Visualization:** Tableau, Power BI
- **Core Competencies:** Full Stack Development, Data Analytics, AI Automation Workflows
- **Soft Skills:** Communication, Teamwork, Quick Learning, Time Management

CERTIFICATIONS:-

- CCNA: Introduction to Networks — Jun 2025
- SKILLSIN CORP: Contribution to National Workshop — Oct 2025
- GenAI: Generative AI for All — Jan 2026
- IBM: IBM SkillsBuild — Feb 2026

PROJECTS:-

Sun Tracking and Solar Monitoring System

- Designed a system to automatically track sunlight direction using sensors, improving solar panel efficiency and monitoring energy output.
- Collected and analyzed sensor data to evaluate tracking accuracy, presenting findings through simple charts and reports.

Smart Retail and Commercial Infrastructure

- Developed a smart IoT-based infrastructure concept for retail and commercial spaces to monitor occupancy and resource usage for data-driven decisions.
- Proposed dashboards to visualize occupancy trends and resource utilization for better business decision-making.

INTERNSHIPS:

NEXGEN TECHNOLOGY | Full Stack Development (Offline) Pondicherry

Certificate of Internship | Feb 2025

- Gained hands-on exposure to full stack development concepts, including front-end and back-end fundamentals.
- Worked with a team to build and test a basic web application, applying core HTML, CSS, and PHP concepts.

NOVITECH R&D Pvt. Ltd. | Data Analytics Intern (Online) Coimbatore

Certificate of Internship | Mar 2026

- Learned data analysis using Excel, SQL, Python, and Power BI; built mini projects and interactive dashboards.
- Improved data visualization, resume building, and interview preparation skills.
- Cleaned and analyzed real-world datasets to identify trends and support data-driven recommendations.

TATA | GenAI Powered Data Analytics Virtual Internship Remote

Jul 2026

- Explored Generative AI applications in data analytics workflows, including automated data summarization and insight generation.
- Practiced prompt engineering techniques to generate accurate summaries and actionable insights from datasets.
- Strengthened understanding of integrating AI tools into real-world data analytics processes.

EDUCATION:-

IFET College of Engineering — B.Tech, Artificial Intelligence and Data Science

2023 – 2027 | CGPA: 8.6

Sacred Heart Convent Anglo Indian Higher Secondary School — HSC, Computer Science

2022 – 2023 | Percentage: 75%
